I am getting a problem like this in the server where I need to be able to retrieve the details of all the records. this is my Stored Procedure in the database. SET ANSI_NULLS ON GO SET QUOTED_IDENTIFIER ON GO ALTER PROCEDURE [dbo].[sp_Search_Customer](@Customer_No nvarchar(255), @Required_Customer Varchar(255), @IsMandatory bit) AS BEGIN DECLARE @Ret_Value nvarchar(100) SELECT @Ret_Value = @Required_Customer IF @IsMandatory = 0 BEGIN SELECT @Ret_Value = @Customer_No END ELSE BEGIN SELECT @Ret_Value = @Customer_No END END Please someone help me with this query. The problem is not the procedure. I have written this query for retrieving the details. select * from Customers where (Customer_No = '123456') A: The problem might be in the length of the variable @Required_Customer. If it is too long or null, it gives an error and returns null. You should check this using a parameterized query: ALTER PROCEDURE [dbo].[sp_Search_Customer](@Customer_No nvarchar(255), @Required_Customer Varchar(255),

```
@IsMandatory bit) AS BEGIN --db procedures can return table or scalar datatypes only --selecting
scalar returns when the procedure returns just one value is at a sql level if @Required_Customer ''
begin DECLARE @Ret_Value nvarchar(100) SELECT @Ret_Value = @Required_Customer if
@IsMandatory = 0 begin SELECT @Ret_Value = @Customer_No end else begin SELECT @Ret_Value
= @Customer
```
